Hello (b) (6)

I heard back regarding the truck that you observed without a tarp. You are correct that the driver should have covered the load. The driver was carrying broken up concrete sidewalks for the City of Wallace and the driver and the City of Wallace did not recall that concrete chunks must be covered or that the material was considered contaminated. The owner/operator of the truck was given a review of the rules for hauling waste and told that any waste that is delivered to LBCR is considered contaminated and must be covered.

Please let me know if you see any other potential issues.

Sincerely,

Bonnie Arthur

Another truck without a tarp, not the first one this year. It looks like icp and the trust cannot police themselves
